

Dear Parents and children,

Welcome to SchoolNova! My name is Diana Zeltser and I will be your Math Enrichment 4-5 teacher.

I look forward to making this a wonderful and fun school year. In this class, I will be playing games with the students so that they can learn math but also feel comfortable in the class room.

Throughout the year, your child will learn about numbers, count, learn basic principles of addition and subtraction, solve word problems, use number line, comparing numbers, sorting, categorizing, and classifying objects, patterns, simple logic problems, identifying and describing shapes.

This will help your child develop their attention, memory, fine motor skills and help expressing their ideas and thoughts. All Math0 material will be printed in classwork and homework books. For homework, we are going to have two books (odd and even numbers), so I can see and check your child's homework. Homework will be assigned every week and I insist that your child completes these assignments. Try not to have your child do their homework in one day. I recommend that it is best that you divide it and have it done throughout the week. Homework will be collected and checked and the students with accomplished homework will receive a sticker. If you and your child have a question on one of the home works please feel free to contact me.

Please try not to miss school, but if your child is sick or away that day you can always find the missing homework and class work in your workbooks and do it. Please try not to be late for the class. It is very disruptive especially for small children. During the 2017-2018 school year I will provide each student with their own materials such as pencils, paper, erasers, games, small prizes and holiday gifts. I am going to collect \$20 materials fee.

I'm very excited to work with you and your child.

If you have any questions feel free to contact me before or after class, or just email me at happytunesinc@gmail.com

Truly yours,

Diana Zeltser
