## Homework 15

Follow the instructions and answer the questions.

1. Plot two points, D and E. Then draw a line DE.
2. Plot point Q not on the line DE .
3. Draw rays DQ and EQ.
4. Find angles EDQ and DEQ in your drawing
a. Is angle EDQ acute? $\qquad$
b. Is angle DEQ obtuse? $\qquad$
5. Look at the drawing and answer the following questions:
a) Find the angle formed by the rays DE and DF . How do we name it? $\qquad$
b) Find the angle formed by the rays CA and CE.

How do we name it? $\qquad$
c) What is BD? (a line, a line segment, or a ray)?
3. Calculate: $3 \mathrm{dm} 7 \mathrm{~cm}+4 \mathrm{dm} 5 \mathrm{~cm}=$ $\qquad$ $26 \mathrm{~cm}+3 \mathrm{dm} 8 \mathrm{~cm}=$ $\qquad$
$7 \mathrm{dm} 2 \mathrm{~cm}-56 \mathrm{~cm}=$ $\qquad$ $6 \mathrm{dm} 8 \mathrm{~cm}-9 \mathrm{~cm}=$ $\qquad$

Homework 14
4.

Write the numbers of the plates with apples and pears into the Venn diagram. Count how many plates are in each set and write your answers in the squares (last column)

5.

Perform the operations. What do you notice?

6.

Solve for x and check your answer:

$$
x+42=418 \quad 271-x=35 \quad x-26=345
$$

7. Calculate:

$$
\begin{array}{llll}
1 \times 0= & 7 \times 1= & 0 \times 4= & 1 \times 17= \\
0 \times 18= & 13 \times 0= & 1 \times 9= & 15 \times 1= \\
\hline
\end{array}
$$

8. Solve the equations:
$9 \times \boldsymbol{x}=9$
$\boldsymbol{p} \times 7=7$
$22 \times \boldsymbol{r}=0$
$\boldsymbol{q} \times 17=0$
$x=$ $\qquad$
$p=$ $\qquad$
$r=$ $\qquad$

$$
\boldsymbol{q}=
$$

$\qquad$
9. Write a correct expression in each case. Calculate the value of both expressions.

|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

10. 

Color the circle, triangle and a square in a way that circle lies on the top of both triangle and square.

11.

There are 24 students in the class. They all have had a wonderful winter break and participated in various activities. 10 of them went skiing, 16 went skating and 12 were making a snowman. None of the students were involved in 2 activities. How many students could do all 3 activities?

12. Perform the calculations for each value of $\boldsymbol{a}$ in the table according to the algorithm and write your answers into the bottom row of the table.

| $\boldsymbol{a}$ | 3 | 5 | 7 | 8 | 10 | 11 | 13 | 15 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| $\boldsymbol{x}$ |  |  |  |  |  |  |  |  |

13. 

Open the parentheses and calculate using the most convenient way:

$$
\begin{aligned}
& 43+(19+7)= \\
& 156+(94-56)= \\
& 247-(47+50)= \\
& 890-(390+40)= \\
& 107+(56-17)= \\
& 432-(150-18)= \\
& (350+49)-29= \\
& (107-36)+46= \\
& (205-184)+194= \\
& \hline
\end{aligned}
$$
