

## HOMWORK 24

April 25, 2021

*I would like to remind you that the homework should be done on a separate piece of paper. There is not enough space on this handout to show all work. **You must show all steps!***

1. State the rule that could be used to conclude that the triangles are congruent. Explain how you know:

a)

b)

c)

d)

2. Find the missing angles. Show ALL work!

a) Line  $l$  is parallel to  $BC$  and  $AB = BC$

b)

c)

d)

3. Solve each equation below. Show all steps

a)  $0.2(x - 2) = 0.7(x + 3)$

b)  $2(x + 3) - 3(x + 2) = 5 - 4(x + 1)$

c)  $3 - 5(x - 1) = x - 2$

d)  $11(y - 4) + 10(5 - 3y) - 3(4 - 3y) = -6$

4. Victoria gives  $\frac{1}{2}$  of her marbles to Mischa, who gives  $\frac{2}{3}$  of what he receives to Ivan, who gives  $\frac{3}{4}$  of what she receives to Alexei. If each has a counting number of marbles, what is the fewest number of marbles that Victoria could have started with?

5. This morning Rishaan had 2 more action figures than Jememah, and Jememah had 8 more action figures than Shreyaan. Rishaan gave some of his action figures to Shreyaan, and now both Rishaan and Shreyaan have the same number of action figures. Jememah now has  $N$  more action figures than Shreyaan does. What is the value of  $N$ ?
