
NAME:

1. Make yourself familiar with the SchoolNova website:

Go to <https://schoolnova.org> Scroll down to locate the “Navigation” box (left side of the page). Click on “Homework” then scroll down to find “Earth Science”. The link will take you to our class page. (Another way to get there: go to “Schedule” then find and click “Earth Science”.) Try all links that appear next to the current lesson date; make sure you can open and view the Classwork presentation (slides that were shown today during class) and the Homework (should look exactly like this page).

2. Open Slide #6 (Page 6) of the Classwork. Recall our discussion of “What do we see on Earth *changing*” and describe the illustrations in the space provided below.

Example: Top left picture shows changing landscape – if we travel around the globe, we observe different kinds of landscape - river valleys/jungle, oceans/seashore, a desert, mountains/glaciers

Your answer:

Bottom left _____

Top right _____

Bottom right _____

3. Try to answer a question “Where is Earth?” Give the most detailed “address” of Planet Earth that you can think of. You may want to draw a picture here to illustrate your answer.
