

NAME:

1. Review Lecture #5.

2. The map below shows major tectonic plates of the modern Earth and how they move relative to each other (black arrows indicate direction of each plate motion).

What type (*divergent, convergent or transform*) of plate boundary is found at:

- |                            |                      |
|----------------------------|----------------------|
| a. ★ (Los Angeles) ?       | d. ◆ (Iceland) ?     |
| b. ▲ (Peru-Chile Trench) ? | e. ★ (Japan) ?       |
| c. + (Himalayas) ?         | f*. 😊 (New York 😊) ? |
