$$6 - 3 - 2 = \square$$

**Problem 3** The figures (F) were grouped according to their properties (size, color, and shape). Finish adding and subtracting according to the grouping rules.

$$B + S = F$$

$$\square + \square = \square$$

$$F - B = \square$$

Color in all of the trees green  
and houses red.

**Problem 5.** Take out 2 leaves from each branch and write the number sentence in the boxes above each branch.

$$\square \square \square = \square$$

$$\square \square \square = \square$$

Write numbers in a “one” order fill out empty boxes.

**Problem 6.** Let's play a "Number Beads Sequence" Game, where the rule for today is:

- if the number gets inside the square, its value increases by 4;
- if the number gets inside the triangle, its value decreases by 2;
- if the number gets inside the circle it stays the same

**Problem 7.** All the circles need to be filled with numbers. You may use the same number as long as you follow the rule: the arrow goes from the LARGER to the smaller number.

**Problem 8.** Color the cubes in a way so that it will be the red cube below the green cube and the yellow cube will be to the right of the green cube.

Color in the pictures if:

- a) The red ball is in a box and the box is yellow inside and blue from the outside.
- b) The red cube is in the box and the box is blue from the inside and yellow from the

outside.

A box is blue from the outside and red from the inside.

## Homework 19.

### Triangular Fairy Tale.

Once upon a time there was a King named Triangular who lived in his Triangular Kingdom. He was very old and very ill. He was trying to find a cure for his disease but he could not find any doctors nearby who could save his life.

The only hope for cure was to find a doctor from far away. However that doctor could not get to Triangular Kingdom as he lived too far. He could treat the King Triangular on the distance using mail. He asked King to write him a letter and send him a triangular map of his Kingdom. The King was so weak that he could not hold a pencil in his hand and could not draw.

Please help King Triangular to draw his Triangular Kingdom. Please remember that everything in his Triangular Kingdom must be made of triangles.

**Bring your triangular maps of the Triangular Kingdom to next class. (You should use rule to draw triangles.)**
