
NAME:

1. Give at least 3 examples of each **qualitative** and **quantitative** data for:
- (a) a farm inspection (b) a regatta

2. Find **all** qualitative (circle) and quantitative (underline) **descriptions** of Voyager 1 in the text below (from Wikipedia):

Voyager 1 is a space probe launched by NASA on September 5, 1977. Part of the Voyager program to study the outer Solar System, Voyager 1 launched 16 days after its twin, Voyager 2. Having operated for quite a long time now, the spacecraft still communicates with the Deep Space Network to receive routine commands and return data. At a distance of 139 AU ($\sim 2.1 \times 10^{10}$ km) as of summer 2017, it is the farthest spacecraft from Earth and the only one in interstellar space. Signals from Voyager 1 take over 19 hours to reach Earth.

Hint: *not all numbers* in the text *describe* Voyager 1!
