

- 1.** Write an expression for the following problems:
  - a.** 3 packages of cookies cost  $a$  dollars. How many dollars do 5 of the same packages cost?
  - b.** 5 bottles of juice cost  $b$  dollars. How many bottles can one buy with  $c$  dollars?

**2. Calculate:**

$$\frac{3}{5} \cdot \frac{27}{45} =$$

$$\frac{14a}{48} \cdot \frac{8a}{42} =$$

$$\frac{3}{5} : \frac{11}{5} =$$

$$\frac{9}{10} \times \frac{5}{12} =$$

**3. Solve the following equations (hint: do the substitution):**

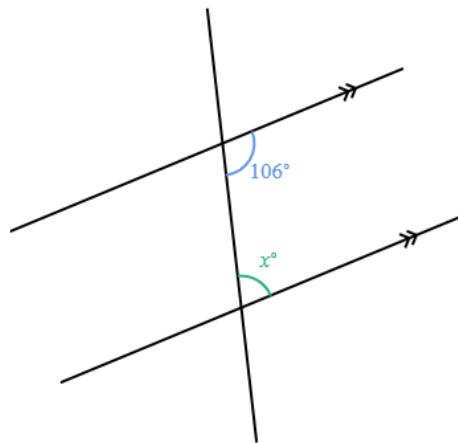

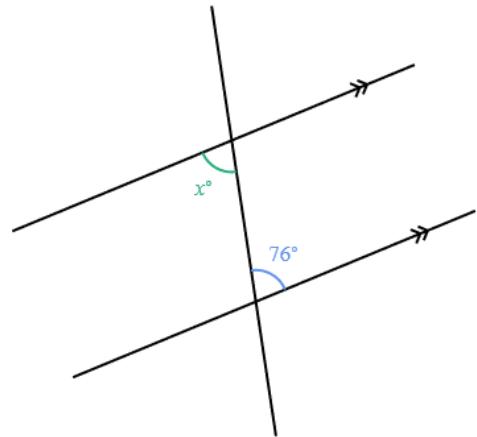

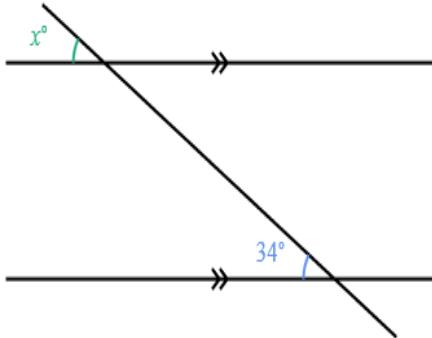

$$a) (15 - y) \times 8 = 48$$

$$b) 250 \div (x + 12) = 10$$

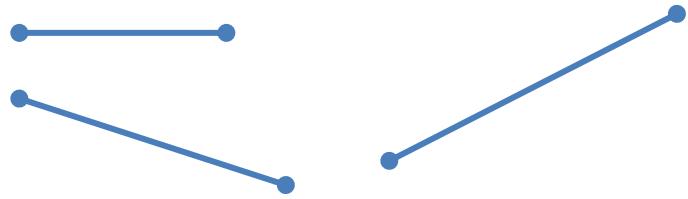

4. In a zoo there are birds (they have 2 legs each) and mammals with 4 legs each. How many birds and mammals are in the zoo, if they have 6000 legs and 2500 heads altogether? (use substitution)

## Geometry:

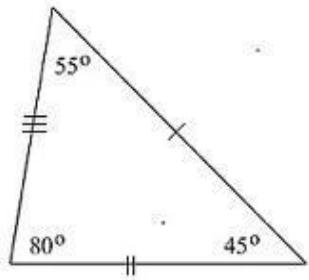

Find the missing angles

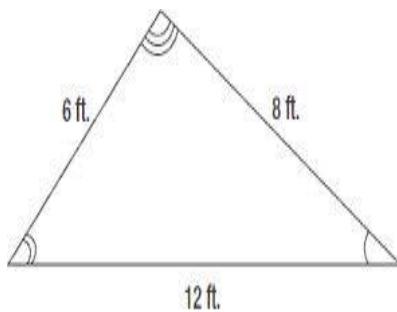

How to construct a triangle with sides equal to three line segments:

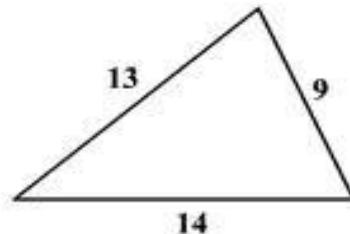

For the given triangles make the correct fit of angles and sides.

- a) 15cm, 10cm, 8cm

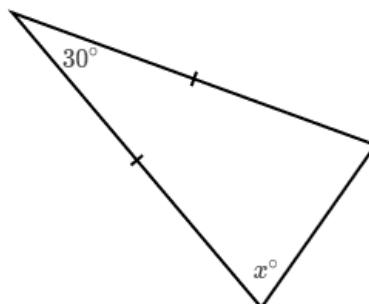

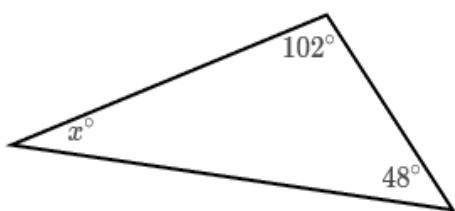

- b) 44°, 70°, ?

- c) 35°, 65°, ?

Find  $x$

### ***Review of a problem from Homework #7***

There are 80 penguins in a zoo and  $\frac{3}{4}$  of them love tuna. While 47 penguins love red tuna, only 42 love yellow tuna. How many penguins love both kinds of tuna?

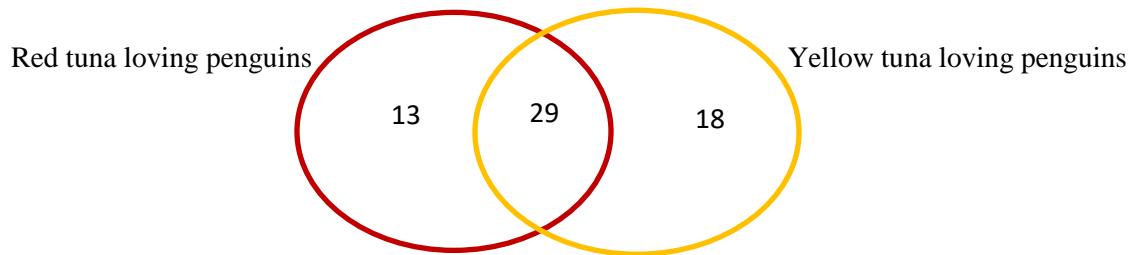

How many penguins love tuna in all?  $\frac{3}{4}$  of 80 which can be calculated by  $\frac{3}{4} \times 80 = 60$

$$60 - 47 = 13 \text{ (13 do not love yellow tuna)}$$

$$60 - 42 = 18 \text{ (18 do not love red tuna)}$$

$$13 + 18 = 31 \text{ (31 penguins love either red or yellow tuna)}$$

$$60 - 31 = 29 \text{ (29 penguins love both types of tuna)}$$

Short solution:  $47 + 42 = 89$  and then  $89 - 60 = 29$
