

NAME:

Explore the globe to find any 7 (seven) places located at or near the equator (within 5 degrees latitude).

Try to find at least one of each of the following: a city, a country, an island, a mountain or a volcano, a lake.

Example: Isabela Island (*Isla Isabela*) of Galapagos, Ecuador

If you do not have the real globe, you can use Google Earth☺ just make sure to select the “everything” view in the menu to see the names of all places as well as “turn on gridlines” to see longitude and latitude lines.

Use the spaces below to list the places you found.

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

7. _____
