NAME:	
1.	If you compare equatorial ocean water temperature at the surface and in the deep close to the bottom, what do you observe? Why? (Hint: review Slides #1-2 of the class presentation.)
2.	Does your observation change as you repeat the comparison within the Arctic or Antarctic circle? Why? (same hint)
3.	What processes in the ocean can result in:  aa <u>local increase of salinity</u> ?

b. ...a <u>local decrease of salinity</u>?
