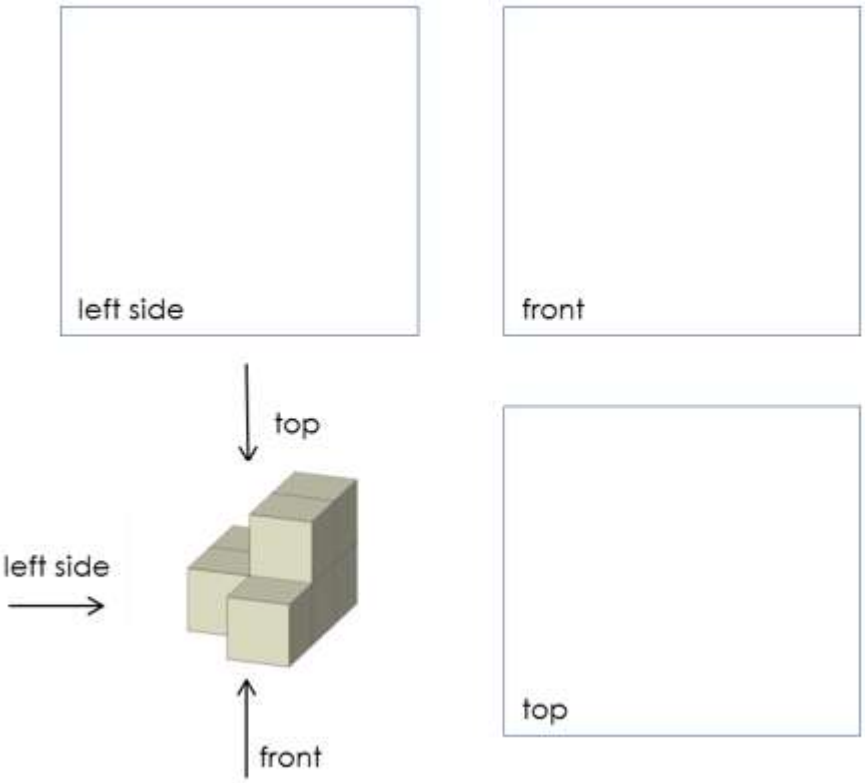
Homework 27.

1 What will you see if you look at the figure from the left and the front? Complete the drawings.



2 Calculate.

33 + 35 – 17 = 84 – 54 – 3 = 44 – 4 + 23 =

79 – 4 + 10 = 20 + 40 + 9 = 57 – 53 + 9 =

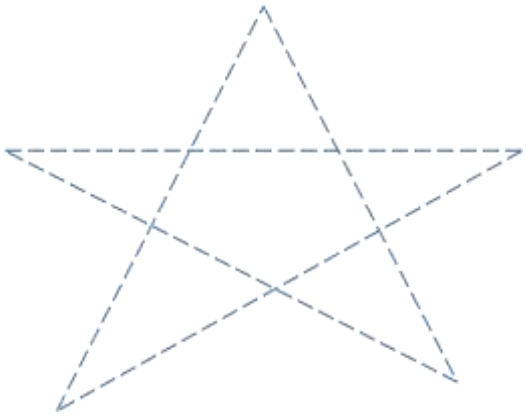
+1

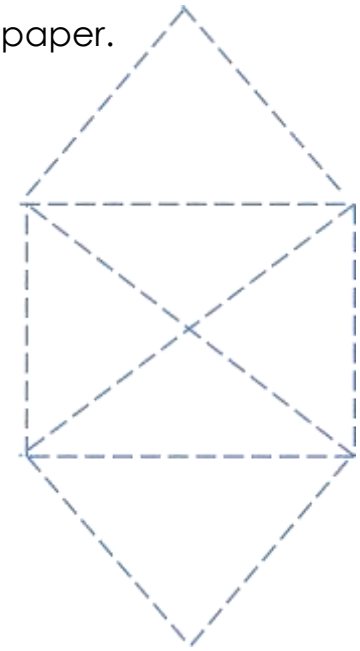
56 + 7	75 + 9	37 + 35	45 + 18	74 + 17	68 + 24	48 + 38

-1

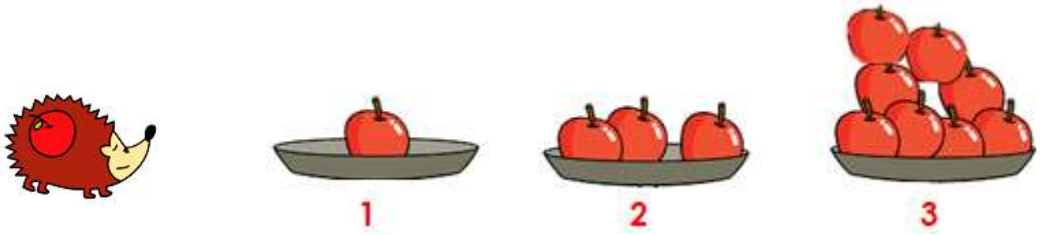
74 - 5	52 - 8	33 - 17	45 - 29	67 - 47	22 - 5	72 - 17

3 Draw the figures without picking up the pencil from the paper.





4



We have three plates with apples on the table. There are 1 apple on the first plate, 3 apples on the second plate, and 8 apples on the third one. You have to make the number of apples the same on each plate, but you need to follow two rules. First: you can move apples from one plate to another as many times as you want, but you can take apples from only one plate at a time and put them on one plate only. Second: you can put as many apples on the plate as it already has (for example, on the second plate you can only put 3 apples right now, not 1 or 2 or 4…). _____

_____

_____

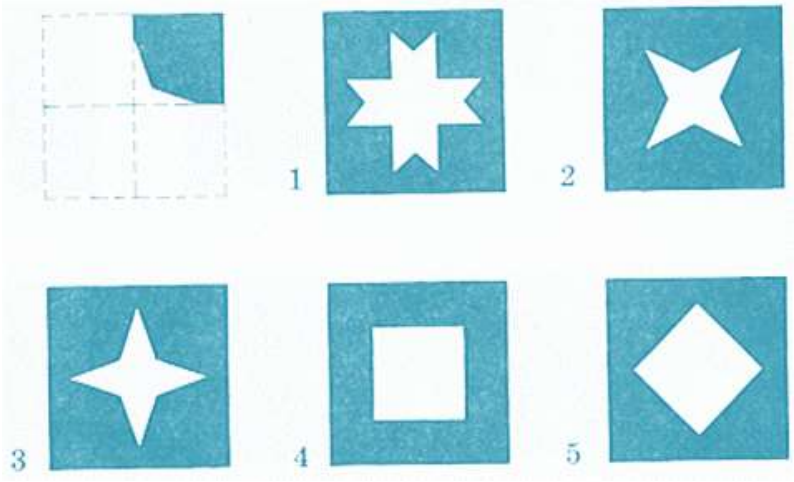
There were 12 men, 4 women and 3 kids on the bus. 6 passengers left on the first stop. How many people remained on the bus? _____

_____

There were 23 students in first grade, and 2 more in second grade. How many students were there in the two grades together? _____

_____

9 A square piece of paper was folded down the middle twice. Then a small piece was cut out. Identify the correct piece that was left after cutting.



10 You can see 3 faces of the cube on picture 1. Finish the drawings 2 and 3 assuming that it is the same cube. If you have problem turning it in your head, cut out templates from this page, glue the cubes and try again.
