

**On December 20, THE LAST SUNDAY BEFORE THE WINTER BREAK, we will play a GEOPARDY! GAME based on what we have learned so far. Please carefully read the game description below and begin to study for it during your break!!!**

**Game description:** you will be presented with a choice of questions; the questions will be grouped into six topics (see a table below), each topic will offer 3-5 questions of various difficulty levels giving you different amount of points; easiest is 10 points, most challenging is 50 points.

<b>Earth in Space</b>	<b>Planet Earth</b>	<b>Inside Earth</b>
10	10	10
20	20	20, 20
50	50	50
<b>Lithosphere</b>	<b>Volcanism</b>	<b>Earthquakes</b>
10	10, 10	10
20	20, 20	20
50, 50	50	50, 50

We will randomly define the order of players (who goes first, who's next and so on). On your turn, you select a question you want to try; you have 30 seconds to answer; if you give a correct answer, you score points; if your answer is incorrect, the question will be "up for a bid" – anyone from the class may try to answer and score. The game continues until we run out of questions or run out of time 😊 We count everyone's points and announce a winner!!!

**PLEASE BE PREPARED** (*you will have a lot more fun if you come prepared*):

1. **The game questions will be about** scientific terms, phenomena, locations, scientist names, objects and concepts that we talked about in class so far.
2. To get ready, you will need to review **Lectures 1 through 11**.
3. (You are not allowed to google or look up answers in the Lectures during the game!)
