## Lesson 16. Homework.

Address. Look at the example and write the addresses in numbers.

2 Add and subtract.

| $80+10-30=$ | $70-50+40-30=$ | $10+40+30-70=$ |
| :--- | :--- | :--- |
| $40-20+60=$ | $60-30-20+50=$ | $50-10-30+60=$ |

3 Insert an appropriate sign (+ or -).

| $20 * 30 * 10=40$ | $60 * 20 * 30=10$ | $70 * 20 * 40=50$ |
| :--- | :--- | :--- |
| $20 * 30 * 10=60$ | $80 * 10 * 40=50$ | $90 * 20 * 30=40$ |
| $60 * 30 * 70=20$ | $80 * 10 * 90=0$ | $10 * 70 * 30=50$ |

1. In a library, there are 7 books on the first shelf. There are 9 books on the second. How many books are on two shelves together?
 1)
2. There are 18 books on the first shelf. There are 8 books on the second. How many more books the first shelf holds?
1) 
3. There are 9 books on the first shelf. This is 3 books less than on the second. How many books are on the second shelf?
1) 
4. There are 12 books on the first shelf. Second shelf holds 6 books less. How many books are on two shelves together?
1) 
2) 
5. There were 14 books on a shelf. Children took 4 books from the shelf and then a librarian put 7 books back on the shelf. How many books are on the shelf? How many more books are now on the shelf than were before?
1) $\qquad$
2) 
6. Children took 3 books from the first shelf and 2 books from the second. After that there were 10 books left. How many books were on both shelves together in the beginning?

1) 

$\qquad$
7. There were 18 books on two shelves. Children took 8 books from the first shelf and 5 books from the second. How many books are left on the shelves?
1)
$5 \quad$ Present as tens and ones:
$72=\square \dagger+\square 0=\underline{70+2} \quad 61=\square \dagger+\square 0=$
$28=\square++\square 0=$
$48=\square t+\square 0=$
$\qquad$
$\qquad$
$95=\square t+\square 0=$ $\qquad$
$22=\square++\square \mathrm{O}=$
$\qquad$

Subtract.

| $14-7=$ | $15-7=$ | $14-8=$ | $15-6=$ |
| :--- | :--- | :--- | :--- |
| $12-8=$ | $11-3=$ | $17-9=$ | $13-7=$ |
| $18-9=$ | $16-9=$ | $13-4=$ | $17-8=$ |

Solve the equations for $\mathbf{X}$.
$9+X=14$
$X=$
$X=$
Check:
$X-5=11$
$X=$
$X=$
Check:
$16-X=12$
$X=$
$X=$
Check:
$X-20=70$
X =
$X=$
Check:

$x-30=40$
$X=$
$X=$
Check:
$x-9=9$
$X=$
$X=$
Check:

7 Figue out the rule and fill the empty cells.

8
A square piece of paper was folded down the middle twice. Then a small piece was cut out. Identify the correct piece that was left after cutting.

You can use a cutout.
