1. Remove parenthesis and simplify:
$(y+3) \cdot(y+2)=$ $\qquad$

$(y-3) \cdot(y+2)=$ $\qquad$

$(y+3) \cdot(y-2)=$ $\qquad$

$(y-3) \cdot(y-2)=$ $\qquad$

$(2 y+3) \cdot(3 y-1)=$ $\qquad$

2. Find lines of symmetry in the 2D shapes below:

3. Solve equations in your notebooks:
a) $|2 x+3|=1$
b) $\frac{1}{1-\frac{5}{x}}=2$

Answers: a) $\{-2,-1\}$
b) $x=10$
4. Color or shade congruent triangles same way:

5. Use a compass to find points $\boldsymbol{C}_{1}$ and $\boldsymbol{C}_{2}$ located 5 cm from point $\boldsymbol{A}$ and 6 cm from point $\boldsymbol{B}$.

Can you find any other point that fits both
$\dot{B}$ conditions?
6. Use table to help to plot graphs for $\boldsymbol{y}=|\boldsymbol{x}+2|$ and $\boldsymbol{y}=|\boldsymbol{x}-1|$. Construct continuous lines for each graph. Find and plot symmetry lines for these graphs.

| $\boldsymbol{x}$ | -7 | -5 | -3 | -1 | 0 | 1 | 3 | 5 | 7 | 9 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| $\boldsymbol{y}$ |  |  |  |  |  |  |  |  |  |  |

| $\boldsymbol{x}$ | -7 | -5 | -3 | -1 | 0 | 1 | 3 | 5 | 7 | 9 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| $\boldsymbol{y}$ |  |  |  |  |  |  |  |  |  |  |

Find rotational axes and planes of symmetry in the 3D shapes below:
