PLEASE SUBMIT YOUR WORK THROUGH GOOGLE CLASSROOM

OPTION 1: print this page, fill in your answers by hand, take a picture or scan, upload, and attach

OPTION 2: create and attach a google document with your answers (no need to copy the assignment itself)

---

1. **Reading Material “Some Historical Units of Measurement”** (can be found on the school website on our class homework page or **use the link in the assignment**).

2. In the space below, copy the historical definition of a “yard” (page #3 or #11).

3. **Applying the above definition to your own body, determine the length of a “yard” using a tape measure** (standard inches 😊). **Make sure there is no bias!**

1 “my own yard” = \_\_\_\_\_ standard inches

Measure again, but now **use your parent/guardian as a reference body:**

1 “grown up yard” = \_\_\_\_\_ standard inches

**How many standard inches is a standard US Customary yard (see page #11)?**

1 US Customary yard = \_\_\_\_\_ standard inches

4. **Are the numbers different? By how much? Why?**
