

## Homework 8

### Problem 1

Color the objects that remind you of a triangle.

Color the triangles according to the color scheme:

**Problem 2** Make all the pictures look like the first one.

### Problem 3

Change the shape:

Change the color:

### Problem 4

Put “+” or “-” sign into the blue boxes to get a proper result.

### Problem 5

- Color the tallest tower yellow.
- Color the shortest brown.
- Color the second tallest blue.
- Color the second shortest red.

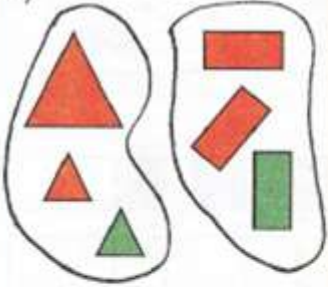

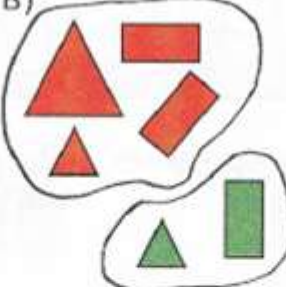

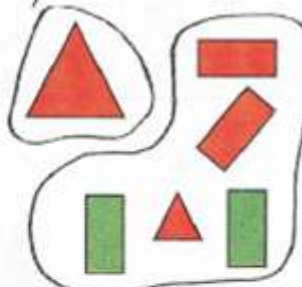

**Problem 6** Guess according to what rules the shapes were grouped. Write the math sentences according to the grouping rules. Fill out the missing letters in the empty boxes.

(HINT: group by shape, color, size)

a) S=shape, T= triangle, R= rectangle

b) R=red, G=green, S=shape

c) B=big, M=small, S=shape

<p>a)</p>  <p> <math>T + R = S</math>  <math>R + T = \square</math>  <math>S - T = \square</math>  <math>S - R = \square</math> </p>	<p>b)</p>  <p> <math>R + G = S</math>  <math>G + R = \square</math>  <math>S - R = \square</math>  <math>S - \square = \square</math> </p>	<p>c)</p>  <p> <math>B + M = S</math>  <math>M + \square = \square</math>  <math>S - B = \square</math>  <math>S - \square = \square</math> </p>
---	---	--

**Problem 7** Draw the objects according to the preposition rule.

## Problem 8

There is a haunted mansion by the ocean. No one know who lives there. The only thing we know is that all of the rooms are occupied and all of the rooms have only one window.

**Can you try to draw a portrait of one of the tenants there knowing that:**

There is an old lady living with three cats on the 1<sup>st</sup> floor.

There is a lonely Princess and an Ice cream truck driver with his dog named Popsicle living on the 2<sup>nd</sup> floor.

There are as many tenants living on the 3<sup>rd</sup> floor as there are on the 1<sup>st</sup> and 2<sup>nd</sup> floor altogether.

There are 2 people less living on the 4<sup>th</sup> floor than on the 3<sup>rd</sup> one.

There is an Astronomer with his parrot living on the loft of this mansion.

**Can you try to guess how many **people** are living there? \_\_\_\_\_**

Loft \_\_\_\_\_

4<sup>th</sup> \_\_\_\_\_

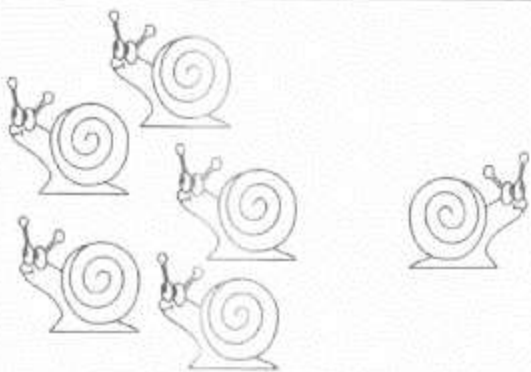

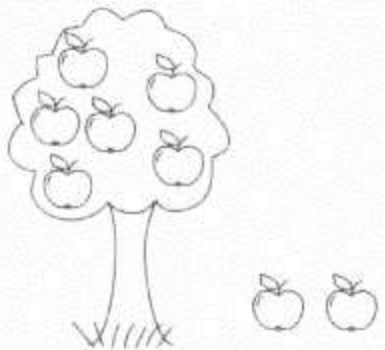

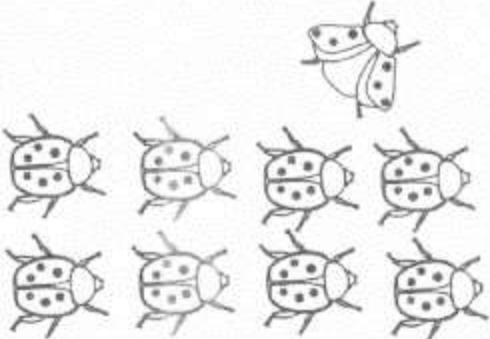

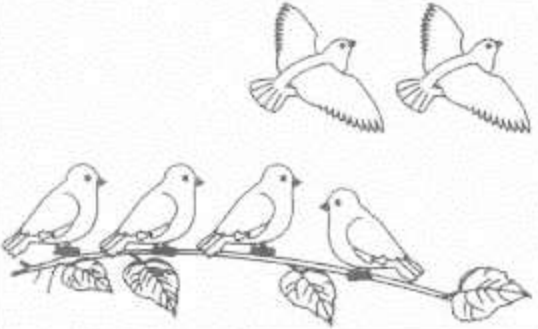

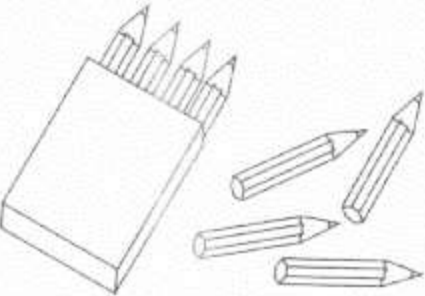

3<sup>rd</sup> \_\_\_\_\_

2<sup>nd</sup> \_\_\_\_\_

1<sup>st</sup> \_\_\_\_\_

**Problem 9** Solve the subtraction problems and write your answers inside the squares.

 <table border="1" data-bbox="292 682 690 766"><tr><td>7</td><td>-</td><td>3</td><td>=</td><td></td></tr></table>	7	-	3	=		 <table border="1" data-bbox="876 682 1274 766"><tr><td>6</td><td>-</td><td>1</td><td>=</td><td></td></tr></table>	6	-	1	=	
7	-	3	=								
6	-	1	=								
 <table border="1" data-bbox="292 1176 690 1260"><tr><td>8</td><td>-</td><td>2</td><td>=</td><td></td></tr></table>	8	-	2	=		 <table border="1" data-bbox="876 1176 1274 1260"><tr><td>9</td><td>-</td><td>1</td><td>=</td><td></td></tr></table>	9	-	1	=	
8	-	2	=								
9	-	1	=								
 <table border="1" data-bbox="292 1648 690 1732"><tr><td>6</td><td>-</td><td>2</td><td>=</td><td></td></tr></table>	6	-	2	=		 <table border="1" data-bbox="876 1648 1274 1732"><tr><td>8</td><td>-</td><td>4</td><td>=</td><td></td></tr></table>	8	-	4	=	
6	-	2	=								
8	-	4	=								

**Problem 10** In how many ways can you divide a sheet of paper by using only 3 straight lines? Draw your answers below.

**Problem 11**

Solve the problems using the number line. It will be easier for your child if an adult can dictate the problem while a child will follow it with his/her finger placed on the number line.

$$8-4-2+3-1+2-3-1=$$

$$5-1+2-3-1+4-2-1=$$

$$7-5+3-3+1-2+4-3=$$

**Problem 12** Ask your child to describe the position of each toy at the top frame of the page.

Then ask him/her to draw the shapes inside the empty frame at the bottom (dictation is important for following directions and developing listening skills).

Draw a circle in the center of the frame. Then draw a square in the top right corner, a rectangle in the bottom left corner of the frame. Now draw a diamond in the top left corner and a triangle in the bottom right corner of the picture frame. You are amazing! Congratulations!
