| 1. Present each number as a product of prime factor |
|--|
|--|

a). 126 = _____

b). 520 = _____

c). 192 = _____

d). 204 = ____

e). 108 = _____

f). 372 =

2. Write the following numbers as products of their prime factors:

a). 1001= _____

b). 2002 = _____

c).24024 = _______(divisible by 24)

Solve in your notebook:

3. Find how many numbers from 1 to 100 are ...

a). ... multiples of 4;

b). ... multiples of 6;

c). ... multiples of both 4 and 6;

d).* ... not divisible by neither 4 nor 6.

Present your results as a simplified Venn Diagram. **Do not** write 100 elements into the diagram, but simply indicate **how many** elements are in each area.

- **4.** At a bus stop, there are three bus lines. One of them has buses running every 3 minutes, the other has buses running every 5 minutes, and the third one, every 7 minutes. At noon, the buses for all three lines meet at the stop. When will the same thing happen next time?
- **5.** Present ...
- a). ... numbers 196 and 12 as the products of their prime factors.
- b). ... the GCM and GCD of these numbers as the products of their prime factors.
- **6.** A person takes a sheet of paper, and then tears it into 4 pieces; then he picks up one of the pieces and tears it into 4, and so on. Do you think he will ever get exactly 200 pieces?

- **7.** Using the Sieve of Eratosthenes try to ...
- a). ... find all primes between 1-200. [You only need to cross out multiples of numbers up to 15.] Circle them.
- b). ... find all pairs of prime numbers that differ by 2. Such prime numbers are called twins. Examples: 5 and 7; 11 and 13. Double circle them or circle them in green.
