

## Homework #24 Text files. Frequency dictionary

Note:

Please, run your code before submitting. If you get an error, try to fix it before submitting your homework. If you get help from anyone, please, make sure that you actually understand the solution.

### Tasks:

1. Continue working on the frequency dictionary from your last homework assignment. Take the same book and load it.
2. Remove punctuation.
3. Convert text to lower register.
4. Create a frequency list excluding the stopwords from the stopwords.txt file that was attached to the last homework assignment.
5. Write the top 30 most frequent words to a text file.
6. Open that file again and add (think which mode you need to use) information about the number of characters in the book and number of words.
