
PLEASE SUBMIT YOUR HOMEWORK THROUGH GOOGLE CLASSROOM

1. How strong is the wind during a Category 2 hurricane? Which *tornado category* has comparable wind speeds?

2. Imagine an eye of the hurricane pass directly over a town. The strong wind picks up, followed by a relatively calm period of time, and then again, the strong wind blowing in the opposite direction is observed. Explain why the wind direction changes to opposite.

3. On MAY 23rd, THE LAST SUNDAY OF SCHOOLNOVA, we will play our **FINAL GEOPARTY! GAME** based on what we have learned in the second part of our course (after the Winter Break).

Please review the game description that will be posted separately in the classroom.

You should begin to study for it this week!!!

You need to review all posted Lectures starting from Lecture 13.
