**A. Review Lecture #23. Pay special attention to Slides ##3-4.**

**B. It's no secret that it is often quite windy at Long Island South Shore Beaches. Typically, on a hot sunny day the wind picks up in the early afternoon, blowing from South. Can you explain how this wind is created? What type of wind is it?**

**C. Name and describe TWO types of STRONG global winds:**

**1.**

**2.**
