

NAME:

A. Review Lecture #23. Pay special attention to Slides ##3-4.

B. What is a jet stream?

C. It's no secret that it is often quite windy at Long Island South Shore Beaches. Typically, on a hot sunny day the wind picks up in the early afternoon, blowing from South. Can you explain how this wind is created? What type of wind is it?

D. Name and describe TWO types of STRONG global winds:

1.

2.
