

---

NAME:

---

**1. Make yourself familiar with the SchoolNova website.**

Go to <https://schoolnova.org> Scroll down to locate the “Navigation” box (left side of the page). Click on “Homework” then scroll down to find “Science B”. The link will take you to our class page. (Another way to get there: go to “Schedule” then find and click “Science B”.) Try all links that appear next to the current lesson date; make sure you can open and view the Classwork presentation (slides that were shown during class), the Homework (should look exactly like this page), and the Reading Material.

**2. Make yourself familiar with our Google Classroom.**

See if you can access Classwork #1 and Reading Material from the classroom stream (also can be found under “Classwork” tab).

**3. Reading Material “Making Sense of Your Five Senses” - read and answer the questions below. Submit your answers through classroom (google doc, photo of your paper and pencil work, fill in answers in Kami – any of the above is fine). Turn in or mark as done.**

**Questions:**

**A. Which of the five senses work by “capturing” particles or molecules from the environment?**

**B. Which of the five senses work from a distance?**
