

NAME:

1. **Finish the rest of Classwork #26** – various examples of light interacting with matter and resulting light phenomena.

2. **Keep studying for the Game!**

3. **“Broken Object Contest”** 😊 😊 😊 😊 😊

Let’s get creative and “break” something – see directions below!

Using a clear glass or clear plastic cup (or *any other* transparent water container, a pyrex dish may work or a vase) filled with water, repeat a “broken pencil” experiment with a different object - anything you like – not a pencil - make it fun!

Submit two photos of your “broken object” (one from the side and one from the top clearly showing the effect) by email to kosobokova@schoolnova.com.

I will combine all photos to show and discuss (and laugh!) in class, so make sure to submit your photos AT LEAST TWO DAYS BEFORE OUR NEXT CLASS so I have enough time to put it all together...thank you!
