

On December 15, OUR LAST CLASS BEFORE THE WINTER BREAK, we will play a GEOParTy! GAME based on what we have learned so far. Please carefully read the game description below and begin to study for it!!!

Game description: you will be presented with a choice of questions; the questions will be grouped into five topics (see a sample table below), each topic will offer 3-5 questions of various difficulty levels giving you different number of points; easiest is 10 points, most challenging is 50 points.

Planet Earth 10 20, 20 50	Globe and Maps 10 20 50	Inside Earth 10 20, 20 50
Lithosphere 10 20 50, 50	Volcanism 10, 10 20, 20 50	

We will randomly define the order of players (who goes first, who's next and so on). On your turn, you select a question you want to try; you have 30 seconds to answer; if you give a correct answer, you score points; partial credit may be given for an incomplete answer. If your answer is incorrect, the current question will be "up for a bid" – anyone from the class may try to answer and score – and you will get a second chance too. The game continues until we run out of questions or run out of time 😊 We count everyone's points and announce a winner!!!

PLEASE BE PREPARED (*you will have a lot more fun if you come prepared*):

- The questions will be about scientific terms, phenomena, locations, scientist names, objects, and concepts that we talked about during class presentations** (including the class taught by the substitute).
- To get ready, you will need to review Classworks 1 through 11.** (You are not allowed to google or look up answers during the game!)
