

NAME:

---

1. Review Classwork #14.
2. One of major earthquake hazards *in cities* is FIRE. Why can it occur?
3. What is *liquefaction*? (skip this question for now!)
4. Reading Material “Measuring Earthquakes” (can be found on the school website on our class homework page).
5. What fraction of all earthquakes occurring around yearly the world can be felt? (Hint: approximately how many earthquakes happen every year? How many can be felt? Now take a ratio!)
