

Welcome to Computer Science 101!

I hope you all had a great summer and are ready for a new semester at SchoolNova.

I am very excited to teach programming this year and I think you will have great fun writing programs and games in Python.

We will start with the basics of programming in Python. This includes variables, conditional statements, loops, and functions. Afterwards, we will tackle more difficult concepts like creating objects and recursion. Python has a large collection of libraries. Time-permitting, I hope we can explore these libraries and find interesting problems to solve.

For the first day of class, please join the class on Google classroom by logging in your SchoolNova account and accepting the invitation to join the class.

I ask of you to be active in class and enable your video and audio during class.

The Zoom Link we are going to use is:

<https://us06web.zoom.us/j/88233786973?pwd=bUQ4ZEFISmx4S09nWnEyci92a0FPUT09>

or:

Meeting ID: 882 3378 6973

Password: 2be102

If you have any questions, please write to me at mata@schoolnova.org.

I look forward to meeting you,

Corina Mata
