

NAME:

1. **Have a World Map handy** (you can use Google Earth if you don't have a paper map, but I strongly recommend the real one 😊, just spread it on the floor and have fun) **as you explore the Reading Material "Fun Sea Facts"** (can be found on the school website on our class homework page).

Make sure you find all mentioned seas on the map (you might still need Google to help you find some locations)!

2. **How many seas are there in the world?**
3. **Which ocean connects to the greatest number of seas?**
4. **Which is your favorite sea (not necessarily from my list, it can be any sea)? Why?**
