

On January 5, OUR FIRST CLASS AFTER THE WINTER BREAK, we will play a TRIVIA GAME based on what we have learned so far. Please carefully read the game description below and study for it during the break!!!

Game description: you will be presented with a choice of questions; the questions will be grouped into six topics (see a sample table below), each topic will offer 3-5 questions of various difficulty levels giving you different number of points; easiest is 10 points, most challenging is 50 points.

Atoms - review 10 10 20 10 50 50	Nuclear Reactions 10 10 20 20 50 50
Waves 10 10 20 20 50 50	All about Sound 10 10 20 20 50 50

We will randomly define the order of players (who goes first, who's next and so on). On your turn, you select a question you want to try; you have 30 seconds to answer; if you give a correct answer, you score points; if your answer is incorrect, the question will be “up for a bid” – anyone from the class may try to answer and score. The game continues until we run out of questions or run out of time 😊 We count everyone's points and announce a winner!!!

PLEASE BE PREPARED (*you will have a lot more fun if you come prepared*):

1. **The questions will be about scientific terms, phenomena, locations, scientist names, objects, and concepts that we talked about in class so far.**
2. **To get ready, you will need to review Lectures 1 through 11 (no Light topics).**
3. **(You are not allowed to google or look up answers in the Lectures during the game!)**
