**1. Make yourself familiar with the (new!) SchoolNova website:**

Go to <https://schoolnova.org> Explore the top navigation menu (top of page), click on “Current School Year” and view the drop-down menu options. Click on “Homework” then scroll down the page to find “Science 2(a or b)” in the left column. The link will take you to our class page.

**2. Make yourself familiar with the google classroom:** login to your SN google account, join our class (lkawmvq6), see what’s posted in the stream. **Completed homework should be submitted in the classroom** (if you choose to print the assignment and complete it on paper, please take a photo and submit an image).

**3. Please ask your parent/guardian to sign below** to acknowledge that you both know how to access our class materials via the website and google classroom, and how to submit the homework. This is very important!

Signature \_\_\_\_\_ Print Name \_\_\_\_\_

**4. Open Slide #3 (Page 3) of the Classwork. List the properties of matter mentioned on the page according to the classification below. Now try to add your own examples!**

**Your answer:**

Chemical properties \_\_\_\_\_  
\_\_\_\_\_

Physical properties: Intensive \_\_\_\_\_  
\_\_\_\_\_

Physical properties: Extensive \_\_\_\_\_
