

Dear students and their parents,

Welcome to **Math 4d for the 2026-2027** school year!

My name is **Anton Petruk**, and I am your teacher at SchoolNova.

If you have any questions, please feel free to email me or chat with me after the class. You can email me at petruk@schoolnova.org.

Here's what you need to know:

Homework: Homework is **assigned weekly**, the next day after the class. All assignments will be posted on the Homework section of the SN web page. Homework will cover topics discussed in class and concepts we're working on. It's okay if you can't complete everything; a partial solution is better than none.

It is important not only to submit the answers but also show all the calculations or show the way you solved the problem. Please, **write neatly on the separate sheet of paper** with enough detail to understand your process. Homework will be collected during the class.

Required supplies: Your child will need **a notebook or paper** and a pencil case with essentials like **pencils, erasers, and a ruler**. You're free to organize in your preferred way, but at a minimum, bring paper, a pencil, and your completed homework if assigned.

I'm excited to work with all of you!

Warm regards,
Anton Petruk
