

Dear Students and their Parents,

Welcome to **Math 4e (online) for the 2026-2027** school year!

I'm **Anton Petruk**, and I am your teacher at SchoolNova.

We will have our first class next Thursday, September 24th. You will be added to the **Google Classroom**. There you can find a Google Calendar link with the schedule. Each class there has a **Zoom meeting** link attached.

To access Google Classroom, you need access to your **SchoolNova Google account** and email. Please make sure to activate your account if it is your first year. After that I will send you an invitation to the Classroom.

Here's what you need to know:

In the class: You will need a pencil and a notebook or paper to write down important ideas, as well as a camera and a microphone. Students **must have their cameras on** during the class.

Homework: Homework is **assigned weekly**, the next day after the class. All assignments will be posted **in Google Classroom** and on the Homework section of the SN web page. Homework will cover topics discussed in class and concepts we're working on. It's okay if you can't complete everything; a partial solution is better than none.

It is important not only to submit the answers but also to **show the work**. Please, write neatly on the separate sheet of paper with enough detail to understand your process, **scan it and upload** to the corresponding assignment of the Google Classroom.

If you have any questions, please feel free to email me at petruk@schoolnova.org.

I'm excited to work with all of you!

Warm regards,
Anton Petruk
